EXPERIENCE

Data Engineer — Java/Kotlin Backend

Jul 2024 – Present

Nexign

- Maintained and developed ETL pipelines in Airflow, including tasks with multi-services interaction with external API, HDFS, Spark, SFTP, S3. Developed plugins for external API interaction. Increased Validation tasks performance by x3
- Migrated Spark jobs writtent in Java using Spark RDD to jobs in Scala using Spark DSL. Refactored legacy jobs reducing resources consumption by 30% and reducing time consumption by 80%, on average. Engineered new functionality to Spark UDF
- Engineered solution to integrate spark streaming with SFTP and solution to make spark jdbc connector to insert nullable strings to enum column in Postgres, by modifying source code
- Optimized Clickhouse queries in ETL jobs, reducing execution time by 40% and refactored storage schema of some tables, decreasing reading time by 40%, on average
- Researched Flink for implementing statefull streaming jobs. Developed jobs writted in Java using DataStream API. Configured deployment for self-managed job cluster using Ansible
- Deployed and administrated Arenadata dist Hadoop cluster in staging environment with Hive and Spark. Configured hdfs and spark clients on client machines. Migrated old cluster HDFS data and Hive Metastore to the new one, solving all incompatibilities
- Successfully completed major versions migrations: Python 3.6 → 3.10, Airflow 2 → 3, Spark 2 → 3, Java 8 → 21, Spring Boot 2 → 3, Hadoop 2 → 3
- Developed several Kotlin micro-services as MVP. Increased RPS by implementing multi-instance thread-safe concurrency with at-least-once semantics. Increased transparency by improving services observability: detailed logs, tracing, comprehensive monitoring
- Maintained Java/Kotlin backend services by bug-fixing of existing functionality and developed new features for these services. Refactored Legacy projects to increase TTL and improve developer UX

EDUCATION

Higher School of Economics (HSE University), Faculty of Computer Science Sep 2023 – Jun 2025

Master's degree in Machine Learning and High Load Systems

GPA: 9.9/10

Thesis: Solar Magnetic Tornado Detection Using Neural Networks

Higher School of Economics (HSE University)

Sep 2019 – Jun 2023

Bachelor's degree in Economics

GPA: 8.78/10

SKILLS

Programming Languages: Python, Kotlin, Java, Scala

Date & DE: SQL, Postgres, ClickHouse, Airflow, Pandas, NumPy, Hadoop Ecosystem (HDFS, Yarn, Hive), Spark (Batch & Streaming), Flink, S3 Ceph, Kafka

JVM: Java 8/21, Spring Boot (MVC, Security, Data JPA / Hibernate, AOP), Concurrency, JUnit, Mockito, Gradle

Python: FastAPI, Celery, SQLAlchemy, Pyscopg, Pytest, Poetry, Flake8, Black, Mypy

Backend Tools: Nginx, Redis, Kafka, Prometheus, Grafana, Telegraf

CI/CD: Gitlab CI, Ansible, Docker, RPM, Bash, Linux, WireMock

Languages: English (C1), Russian (Native)
